

Solar Battery Solutions

DMS technologies specialises in the supply of solar batteries and systems. We can provide both “off the shelf” and “bespoke solutions” to meet your Solar requirements. These can be at any capacity you require and at various voltages with 6 and 12 Volts as standard.

We provide full technical and sales support throughout the design process, for custom and standard applications.

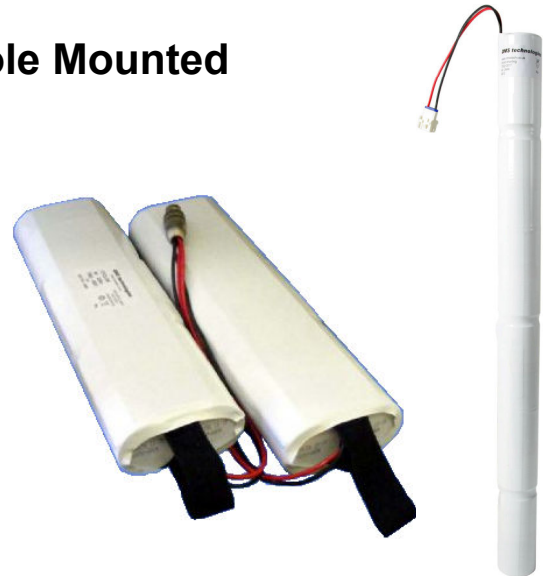

Enclosure

Advantages

- Robust, sealed construction
- AGM technology; will not leak if damaged
- No Maintenance
- Can be fitted upright or on its side
- Industry standard sizes
- Good low temperature performance

Pole Mounted

Advantages

- Wide Operating Temperature Range
- Lightweight & Compact
- Long cycle life
- Long performance life
- High shock and vibration resistance

Typical Applications

- LED Road Signs
- Bus Shelters
- Off-Grid Solutions
- Leisure (Boats, Motor homes, Caravans etc.)
- Street Lighting
- Meteorological Monitoring Systems
- Surveillance Systems
